

UNIVERSAL POWER STEERING FLUID

MECHA TOOL Universal Power Steering Fluid is a high quality formulation using highly refined base oils and select additives to provide year-round smooth and reliable performance. It provides optimum protection and service in power steering systems of both foreign and domestic vehicles. This fluid helps to control seal swelling and protects pump parts against wear while providing the proper frictional properties for optimum performance. It is designed to protect against wear, oxidation and corrosion as well as protecting against foaming, clogging and rust. It will not harm rubber hoses and stops power steering squeaks. This product is blended to mix with original equipment fluids. Some automobile manufacturers recommend use of power transmission-type fluids, such as DEXRON® III, MERCON®, and Type F. Check the owner's manual for correct fluid type.

TYPICAL TEST DATA		
Gravity, ASTM D 287	API	32.5
Lb / Gallon		7.20
cSt @ 100°C		5.1
Flash Pt. °C		190
Pour Pt. °C		-10
