

TRACTOR HYDRAULIC FLUID

Topper Tractor Hydraulic fluid for tractor transmission and hydraulic oils are unique oils developed with premium additives and bases to meet the exact needs of tractors utilizing tractor hydraulic fluid.

Topper Tractor Hydraulic fluid has been performance tested both in the lab and in the field, and validated to meet the increased demands for performance and protection of transmissions and hydraulic systems.

Benefits:

- Reduces wet-brake chatter and ensures high braking capacity.
- Superior wet-clutch performance, smoothes clutch operation.
- High tolerance to water contamination without sludge formation, which could cause filter clogging and hydraulic system malfunction.
- The anti-oxidation capability allows the oil to work properly at high temperatures, helping keep transmissions and hydraulic system parts cool and clean.
- Provides protection against rust and corrosion, particularly during low-use periods.
- Anti-wear additives keep gear and bearing wear to a minimum.
- The extreme-pressure formulation develops a durable fluid film, which helps prevent metal-to-metal contact.
