

MOTION-PLUS™ Oil Stabilizer is a 100% petroleum-derived additive designed to improve engine performance and protection. Its advanced formula raises oil pressure, increases power, eliminates dry starts, and significantly reduces engine wear.

It is compatible with heavy- and light-duty engines and contains the exclusive MOTION-PLUS™ Engine Treatment, which protects metal parts from friction and excessive wear.

2. KEY BENEFITS

- Increases oil pressure.
- Improves engine power.
- Eliminates dry starts.
- Reduces friction and wear.
- Extends engine life.
- Compatible with transmissions, differentials, compressors, and other mechanical systems.

3. USAGE RECOMMENDATIONS

For best performance, use MOTION-PLUS™ following these proportions according to the application:

- New engines: 5% to 20%
- Older engines: 5% to 25%
- Light-duty transmissions: 5% to 10%
- Heavy-duty transmissions: 10% to 20%
- Differentials and transfer cases: 10% to 20%

- Compressors: 10% to 20%
- Motorcycles and lawnmowers: 5% to 10%
- Noisy or worn differentials: 50% to 100%
- Severely worn engines: up to 60% of system capacity

4. COMPATIBILITY

MOTION-PLUS™ Oil Stabilizer is safe for new vehicles and will not void the warranty when used according to the vehicle manufacturer's recommendations.

5. PRESENTATION AND APPEARANCE

Physical State: Liquid

Color: Amber

Odor: Characteristic of petroleum

Flash Point: >425°F

Viscosity at 100°C: ≥ 110 cSt
